Project Description

Project/Site Name:

Location:

Address:

City: State:

Type of System to be Quoted: DPE SVE Air Sparging Pump & Treat Bio-slurp LNAPL Recovery

Soil Flushing Combination (list):

Permanent System (specify enclosure type):

Trailer-mounted (state frequency of operation):

Chemviron can provide costs for Purchase Rent/Lease "Turn-key" with operator

If rent/lease, please specify anticipated term:

Soil & Groundwater Remediation Technologies

Contaminant Type

LNAPL Gasoline Diesel Oil Mix (list)

other VOC (list)

Please attach expected influent concentrations for contaminants of concern

Basic geology and hydrogeology (describe soil/rock types, water-bearing unit character, etc.)

(Please attach a site map showing extraction well locations)

Expected influent flow rate (gpm): Number of extraction wells:

Depths: Diameter:

Discharge Requirements

LEL Monitoring? BTEX (list effluent concentrations)

MTBE (list effluent concentrations)

Other (list effluent concentrations)

Discharge point: storm sewer sanitary sewer stream other (list)

Compliance Agency (identify):

Other

Quote due:

Anticipated project start date:
